Version 4.1.0.17

# Important Notice

Jetro Platforms reserves the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to Jetro Platforms's terms and conditions of sale supplied at the time of order acknowledgment.

Jetro Platforms warrants performance of its products to the specifications applicable at the time of sale in accordance with Jetro Platforms's standard warranty. Testing and other quality control techniques are used to the extent Jetro Platforms deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

Jetro Platforms assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using Jetro Platforms components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

Jetro Platforms does not warrant or represent that any license, either express or implied, is granted under any Jetro Platforms patent right, copyright, mask work right, or other Jetro Platforms intellectual property right relating to any combination, machine, or process in which Jetro Platforms products or services are used. Information published by Jetro Platforms regarding third-party products or services does not constitute a license from Jetro Platforms to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from Jetro Platforms under the patents or other intellectual property of Jetro Platforms.

Resale of Jetro Platforms products or services with statements different from or beyond the parameters stated by Jetro Platforms for that product or service voids all express and any implied warranties for the associated Jetro Platforms product or service and is an unfair and deceptive business practice. Jetro Platforms is not responsible or liable for any such statements.

All company and brand products and service names are trademarks or registered trademarks of their respective holders.

Part number: 1003, February 2010

## Printing

- Fixed issues with print jobs file names not being processed correctly resulting in no printout.
- Added handling for printing scenarios where the printing is sent directly to the spooler.
- Implemented native printing with tcp/ip ports.
- Changed printer mapping to be asynchronous to improve login time.
- Changed default printer mapping name convention to `PRINTER_NAME|MACHINE_NAME|USER_NAME`

## Server

### Application delivery:

- Fixed issues with Universal connector
  - Reconnect to disconnected session
  - Secondary sessions
  - Added logoff to CUC policy
- Implemented a new server to client content redirection and http content redirection with managed url exclude.
- Implemented support for multiple Domain trusts
- New desktop mode.

## Secure browsing

- Created Agent self set Policy for low level elevation.

## Admin console

- Added more session information in monitoring.
- Added idle time to session monitor.

## Client

- Fixed issues with secure connector
  - added compatibility for windows 2000
  - Fixed auto reconnect
  - added the ability to use multiple secure connector servers as listed by the controller
  - removed the user ability to remove secure connectors from the list provided by the controller
  - Increased login speed for secure connector.
- Fixed issues with Client update
  - Minor bugs fixed
  - Fixed issues with download mechanism for updates
- Client changes
  - Added functionality to the client to include log off, disconnect as buttons in the client, system tray and application panel.
  - Improved support for windows 2000.
  - added remember password button, allowing it to be set by the administrator and giving the user the control on whether the password is remembered

### Known issues:

- TS name resolved ONLY by DNS name
  - A client connecting via corporate VPN will need to have 1 of the following additions to connect successfully:
    - IP → DNS name resolution in workstation host file
    - DSN export received from the VPN client
