FOR IMMEDIATE RELEASE

Jetro Platforms Debuts COCKPIT® version 4.0 Beta

Jetro COCKPIT 4.0 is now available for beta testing by select customers; the new version covers both Application Delivery and Secure Browsing solutions and includes an advanced Administrator Console, new Printing module, and more

Tel-Aviv, Israel, June , 2009 - Jetro Platforms, a leading provider of server-based application virtualization software solutions today announced that it has released the newest version of its flagship COCKPIT® solution. The new COCKPIT version 4.0 introduces new features across all of the product's components including the Server Back-End, Clients, and Administrator Console. In addition, COCKPIT 4.0 features a new integrated Printing module that supports both Universal Printing and Native Printing modes, centralized, integrated management of both the Application Delivery and the Secure Browsing solutions, and more. Jetro's COCKPIT 4.0 is currently available for beta testing by select customers.

COCKPIT version 4.0 builds on the continuing success of the previous versions of Jetro COCKPIT that already serve hundreds of organizations worldwide. It enhances COCKPIT capabilities by adding a host of features including:

- New Administration console for superior management, monitoring and control
 - ▶ An integrated solution for managing both Secure Browsing and Application Delivery from a single point of control
 - ▶ Rich tree-view navigation
 - ▶ Friendly table manipulation
 - ▶ Centralized monitoring and management of servers, sessions, resources, and more
 - ▶ On-line data export and reporting
 - ▶ New and improved license management and monitoring
- New Client side software for unmatched user experience and performance
 - ▶ Instant session creation
 - ▶ User-controlled settings of backgrounds, colors, toolbars, icon layouts, and more
 - ▶ Intuitive management of connections, session, and applications.
 - ▶ Improved handling of network instability and reconnects
 - ▶ Multiple monitor support
 - ▶ Support for working simultaneously with multiple COCKPIT farms (e.g., insurance agents with multiple insurance companies, sys admins with test and production farms, etc.).

 - ▶ Supports stand-alone Microsoft Terminal Services

- Updated Cockpit-On-Key for users on the road

"COCKPIT 4.0 helps us to better meet customer demand for feature-rich, cost efficient solutions that are easier to use and manage," said Giora Shaked, CEO of Jetro Platforms. "This new solution underlines Jetro's commitment to providing true added value with every product. As a result, we see more and more organizations turning to Jetro for advanced and secure server-based virtualization solutions

"After evaluating COCKPIT 4.0 we found it to be the ideal solution for organizations of all sizes," said Tsur Yahav of ONE1 System. "We were particularly impressed by the ease of installation, implementation and use of COCKPIT 4.0. Additional compelling features were the system's user-friendly Client side as well as its advanced Printing module."

The new version will be available to all Jetro Platforms users that are included in the annual maintenance contract service without extra charge.
