Visa Cal Implements Jetro Secure Browser Solution

The secure browser, implemented over MS Terminal infrastructure, allows hundreds of users to safely access online applications

Tel Aviv, Israel, March, 2009 - RDT Jetro, a leading provider of server-based application virtualization software solutions today announced that **Visa Cal, the leading credit card and clearance company in Israel**, is implementing Jetro's Secure Web Browser solution across its Israeli operations. The implementation of the project was led by ONE1, Jetro's representative in Israel.

Jetro's Secure Browser solution was selected to enable hundreds of Visa Cal employees to gain secure access to the internet. Activated over a Microsoft Terminal Server, this unique solution handles all internet related browsing on a remote, secure server. Users receive video-like images that are transferred to them instead of HTML, leaving the network completely unexposed to the internet and therefore, 100% secured. This is performed without affecting user experience.

"Thanks to the implementation of the Secure Browser we managed to overcome challenges that were caused by network diversification. We were able to speed up business activity and allowed users to perform, their daily tasks in a simple, transparent and secure manner," said Anatoly Weisman, Infrastructure Unit Manager at Visa Cal. *"Furthermore, we achieved significant operational cost reduction and enabled the use of mobile communication tools. The Jetro Secure Browser eliminated the need to use special dedicated PCs for web access, opening a new world of business opportunities to employees and managers."*

Tzur Yahav, VP and Manager of Jetro Business at ONE1 said: *"We are happy to add one more customer to the growing list of distinguished institutions already implementing Jetro's Secure Browser. This solution complies with all the regulations for secure web browsing set by the Israeli Superintendent of Banking."*

"Visa Cal is one of the largest financial corporations in Israel and we are proud to have our solution selected by them," said Giora Shaked, CEO of RDT Jetro. *"All across the world the need for Virtualization solutions is on the rise. RDT Jetro is determined to stay ahead of the competition and offer our customers the best technology for the best cost position."*
